

# E-RAZOR & ELIMINATOR COMBO

## Camouflage & Stain Remover for Ceramic & Chrome Engraved Rolls

E-Razor scrubbing block has a unique hook and lock tape that allows removal of the sponge from the wooden block handle when worn out and replacement with a new E-Razor sponge.

Apply 3-4 drops of Eliminator solution to the sponge block for each cleaning or pre-conditioning application.

Rub E-Razor sponge in a circular motion across the roll face until the entire surface has been uniformly scrubbed. Solution should begin to foam slightly as cleaning process begins to take place.

You should begin to see ink discoloring on the E-Razor sponge and, at the same time, any staining or camouflaging should begin to disappear from the roll surface. Finally, rinse with fresh water and wipe dry.
