

# DUAL HEAD LIGHT WEIGHT PERISTALTIC PUMP

## FEATURING AN EASY TO CLEAN, ALL ALUMINUM, SPACE SAVING DESIGN

Dual feed pump provides pressurized supply and return from chamber to precisely control internal chamber pressure.

The heavy duty aluminum construction features aluminum occlusion spools, internally lubricated drive gears, low maintenance, and is easily cleaned.

Compact space saving design is approximately 14" x 13" x 10" overall.

Your choice of air motor, 240 V three phase, or 120 V single phase electric servo drives.

### Standard features include:

- Four roller ink supply spool and three roller ink return spool
- Steel mounting stand and easy carry handle
- Internal oil sump for maintenance free lubrication of drive gears
- Oil level site glass and pressure purge
- Cast gears and steel gear shafts for long lasting service

Gear reductions of 5:1, 10:1, 15:1, or 20:1 depending on the flow rates required for the application.
